**MTDS COLORING BOOK**

---

This is our customer.  
Color him brave!

This is our Marketing Specialist.  
Color his glasses rose.

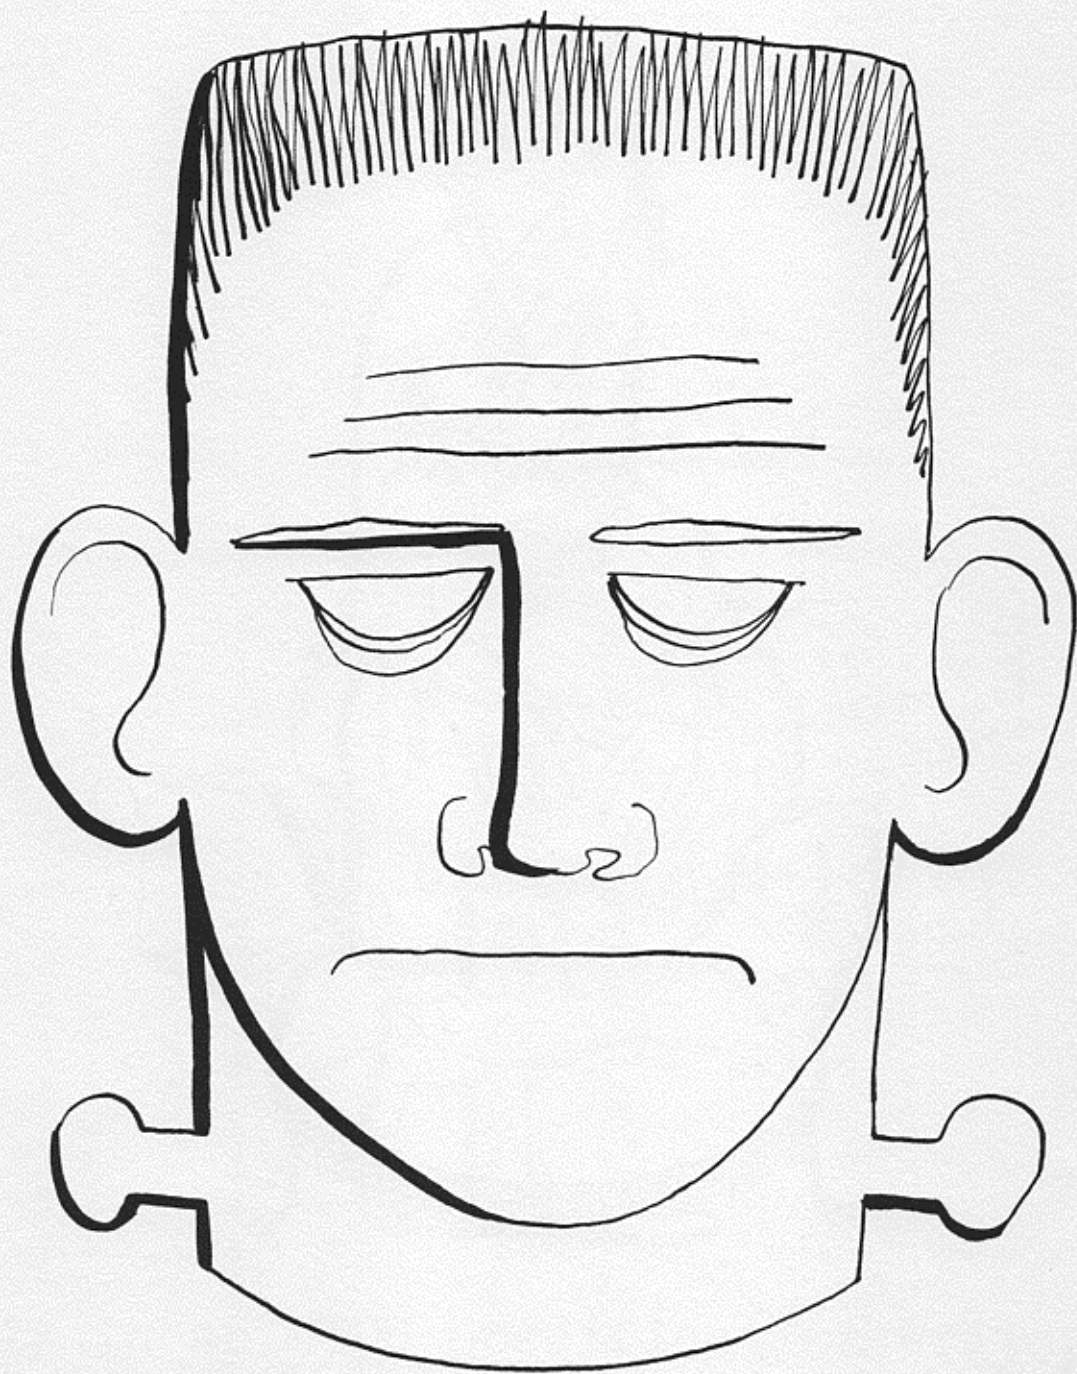

This is one of our contract negotiators.  
Color his mask, gun and heart black.

This is an MTDS Specification Writer.  
Color him red or green or blue or  
something like that. But be sure to use  
an 0.432" diameter, non-toxic crayon.  
(Crayola 437652-A or approved equal)

This is the one who interprets our specifications. Color him smart.

This is a human type engineer. See if you can color some life into him.

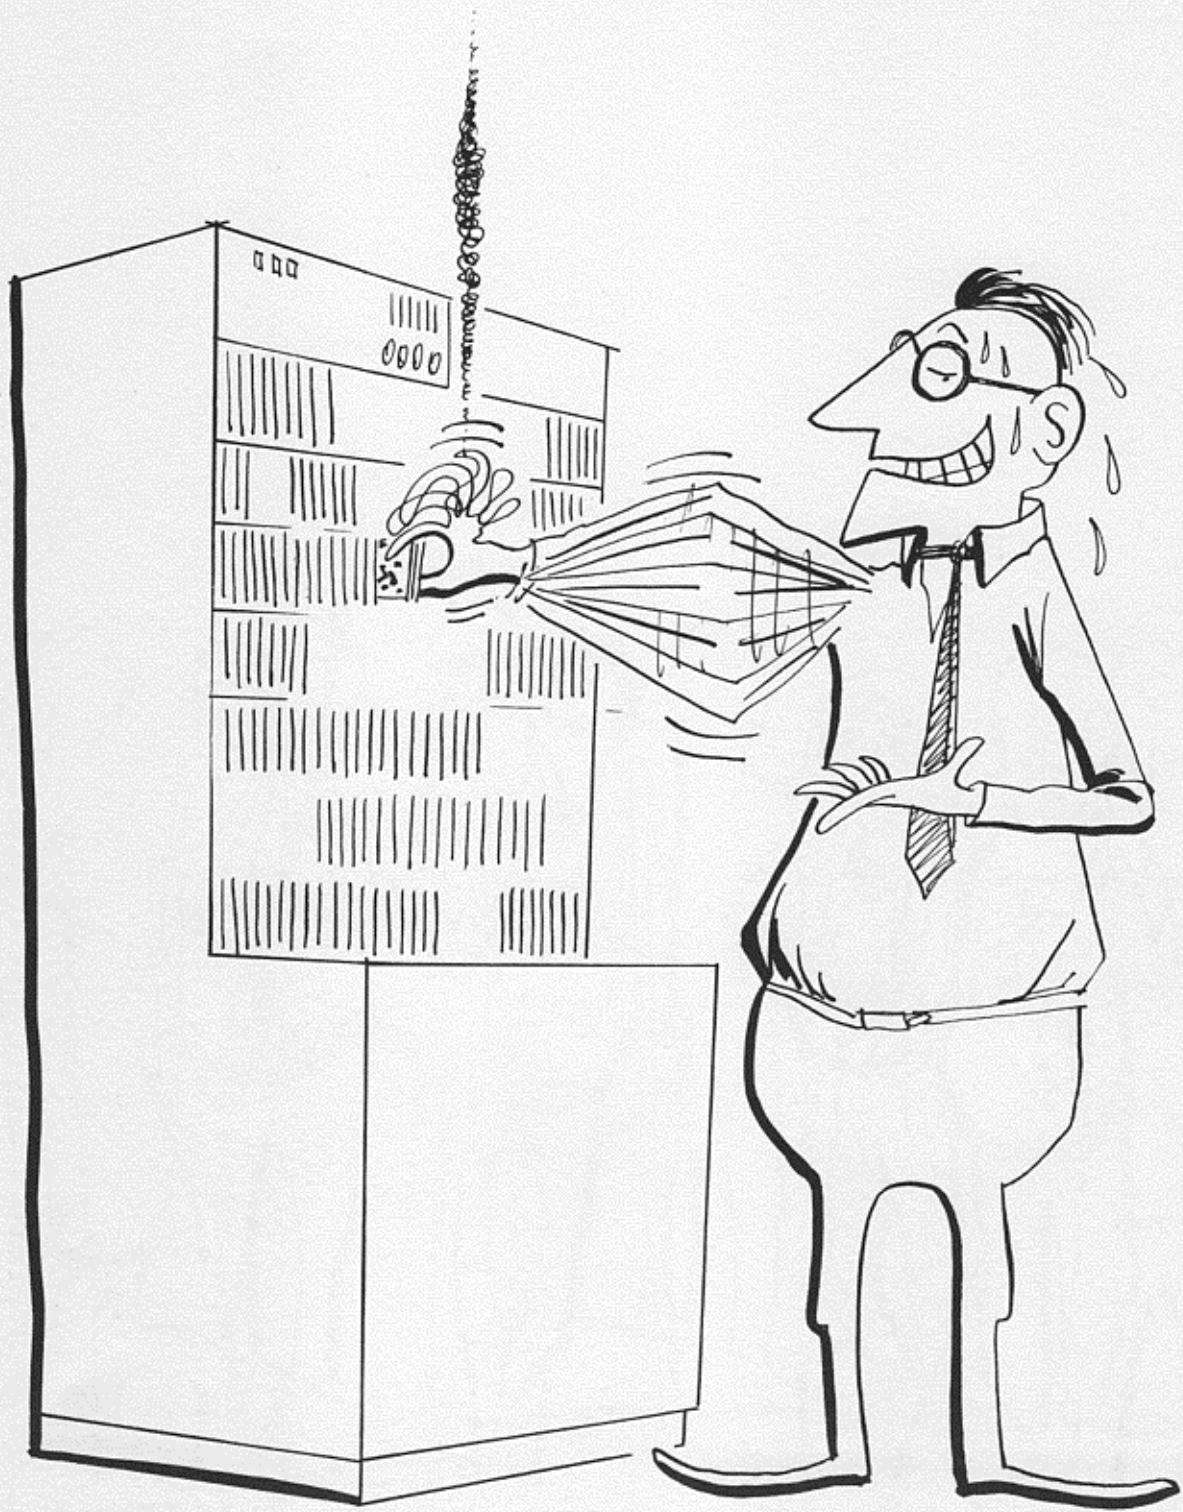

This is a universal console operator.  
Color his eyes bloodshot.

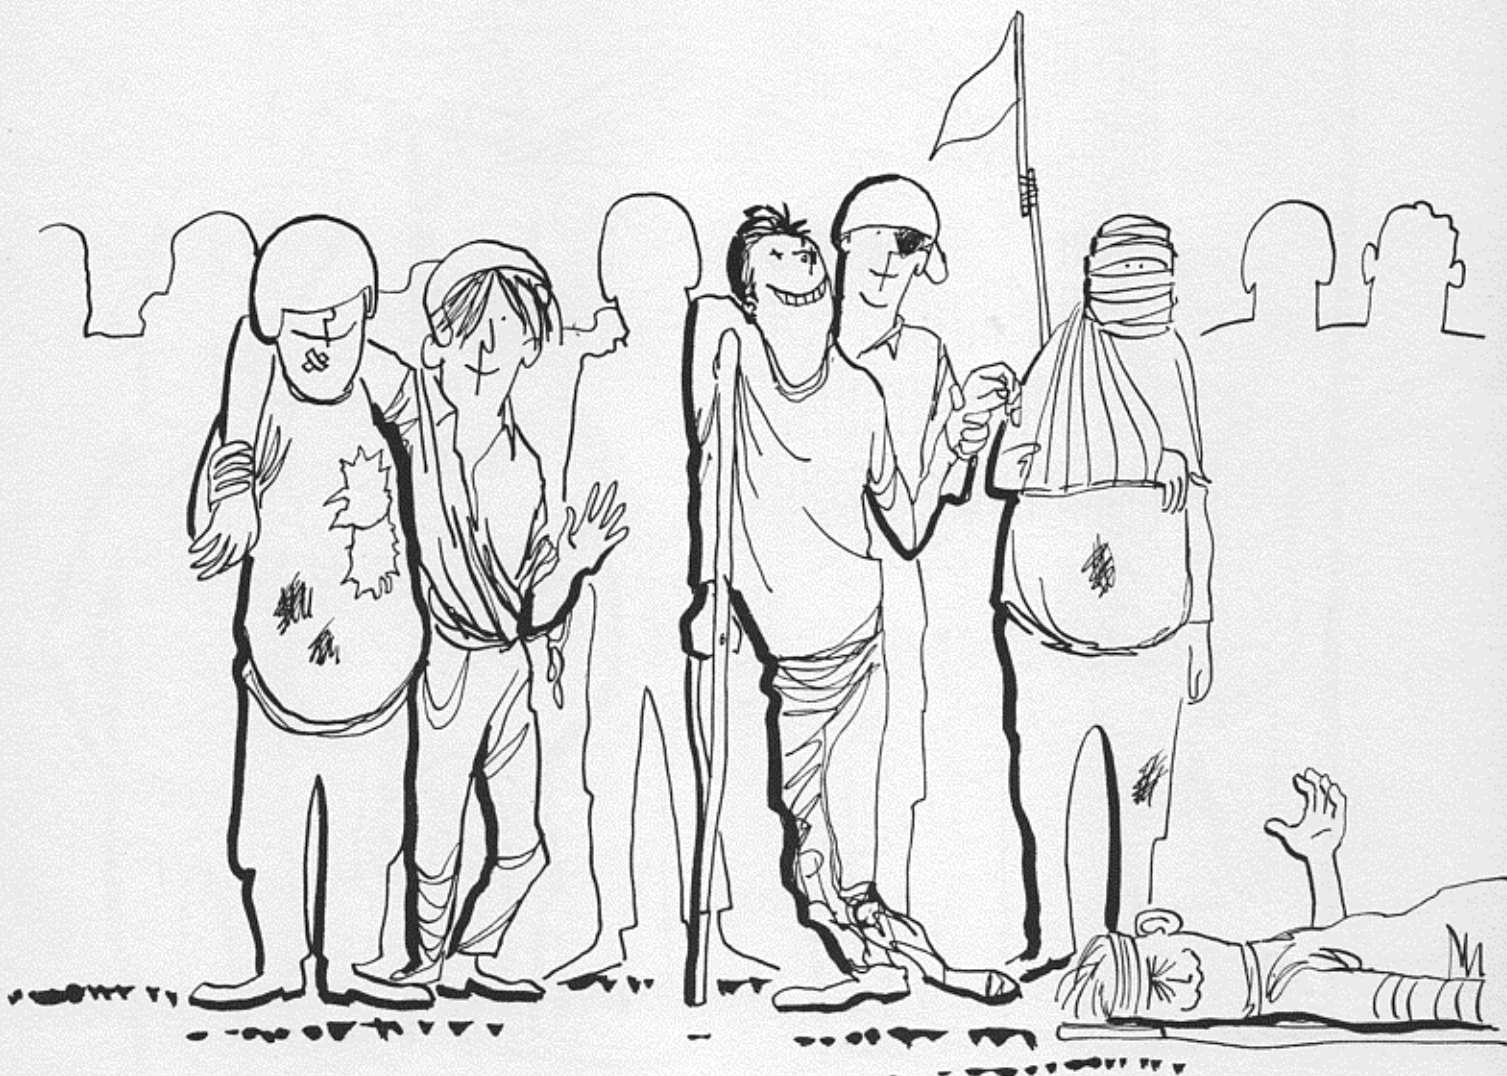

These are some of our fabrication specialists alertly waiting for yet another MTDS system to roll down the assembly line. Color the cobwebs gray.

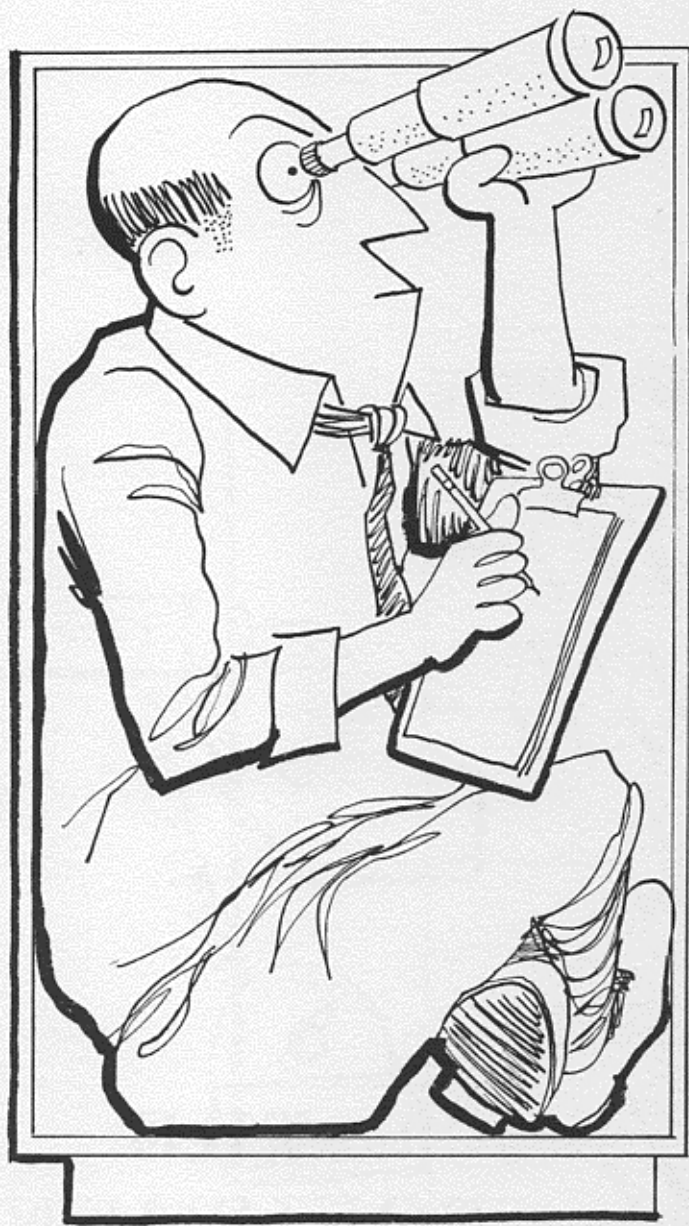

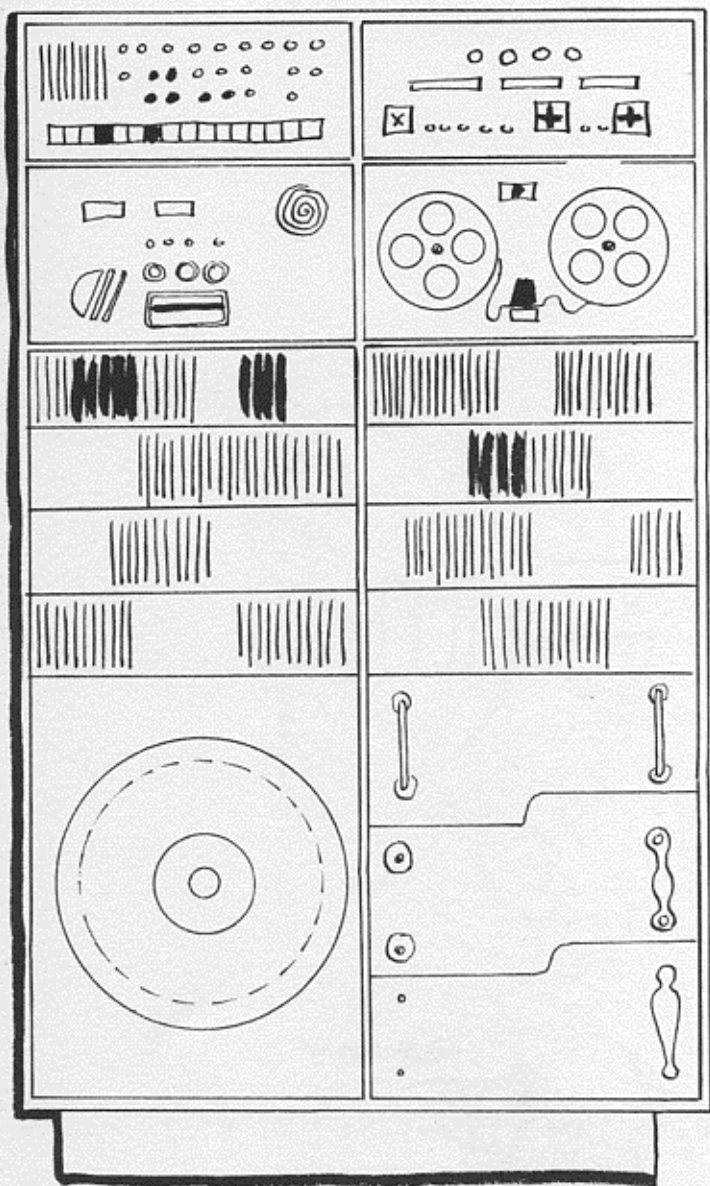

This is one of our engineering checkout specialists demonstrating how easy it is to remove a circuit card. Discolor his fingers.

This is the MTDS Program Office football team. Color them black & blue. Redden their faces. (They do not require further shellacking.)

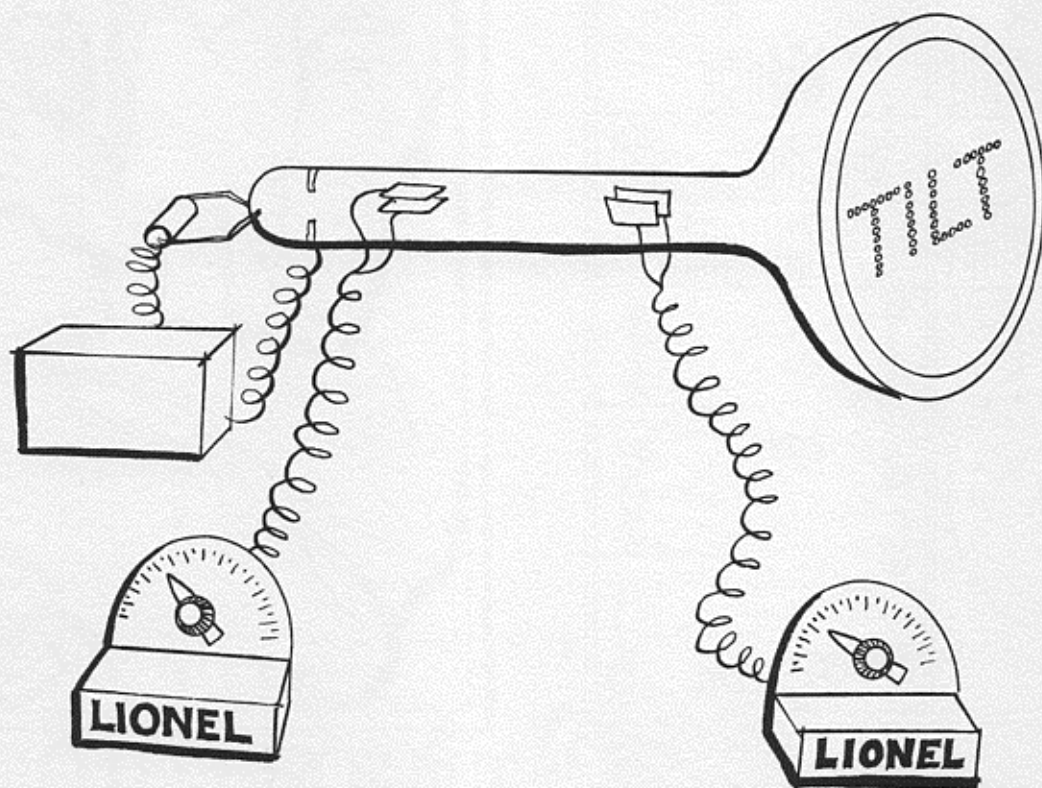

This is our latest Program Manager.  
Color him fast.

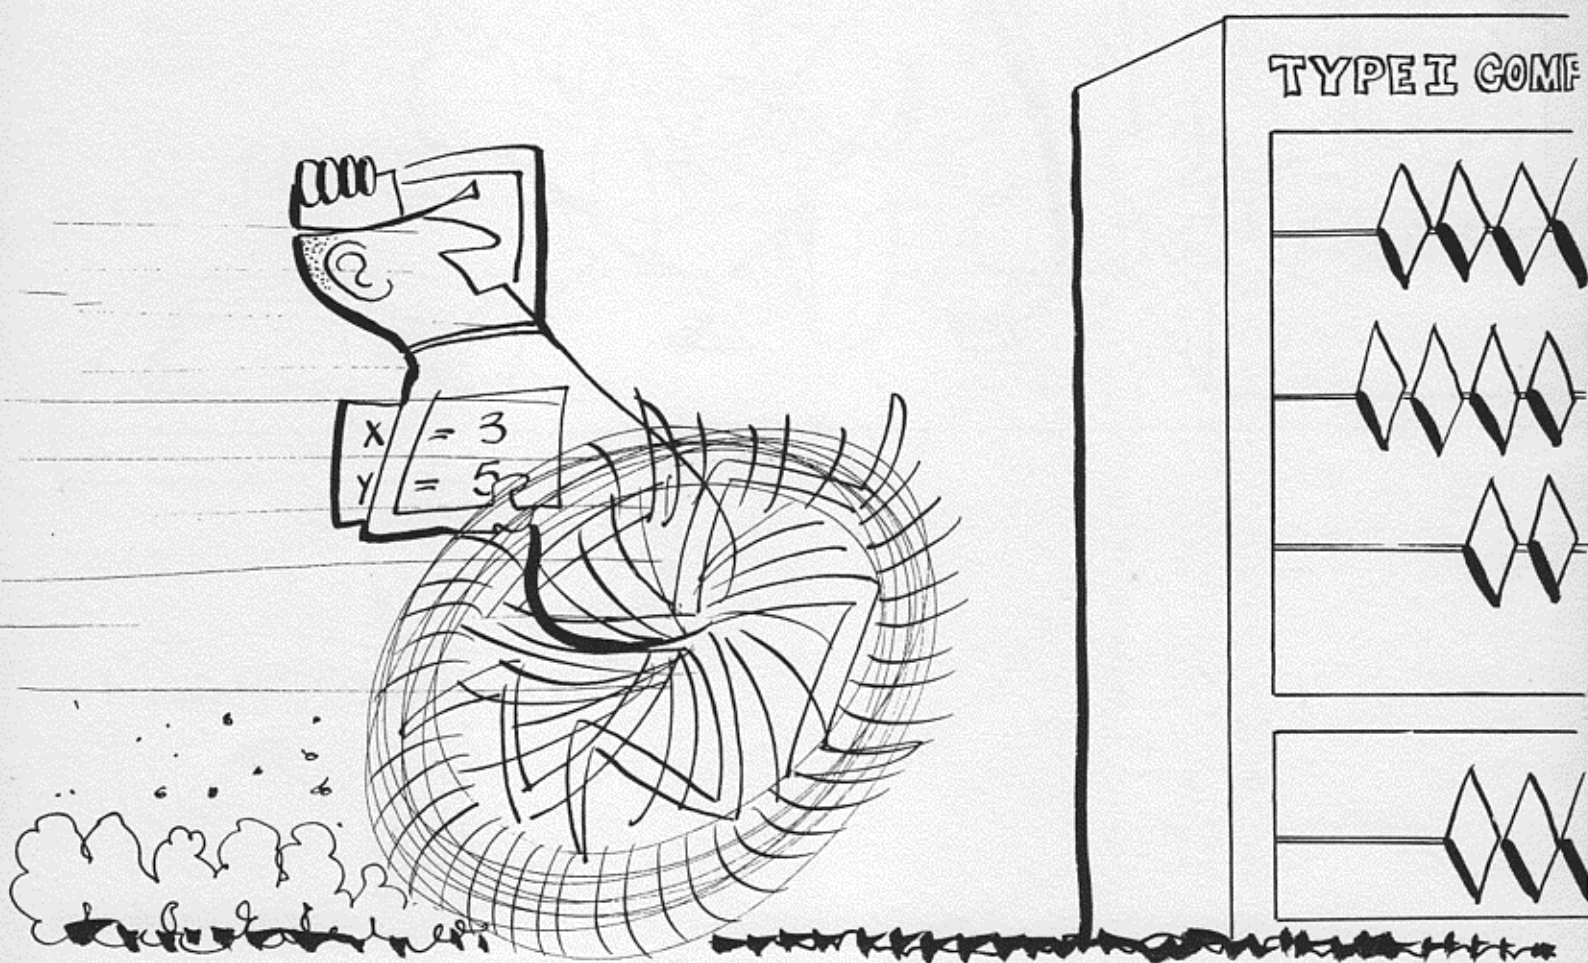

This is our detection and tracking computer. Make it an off-color.

(Rear View)

This is the general purpose symbol  
display programmer.  
Color the programmer ambidextrous.

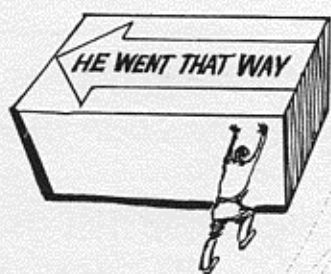

This is the console to computer buffer.  
Color him busy.

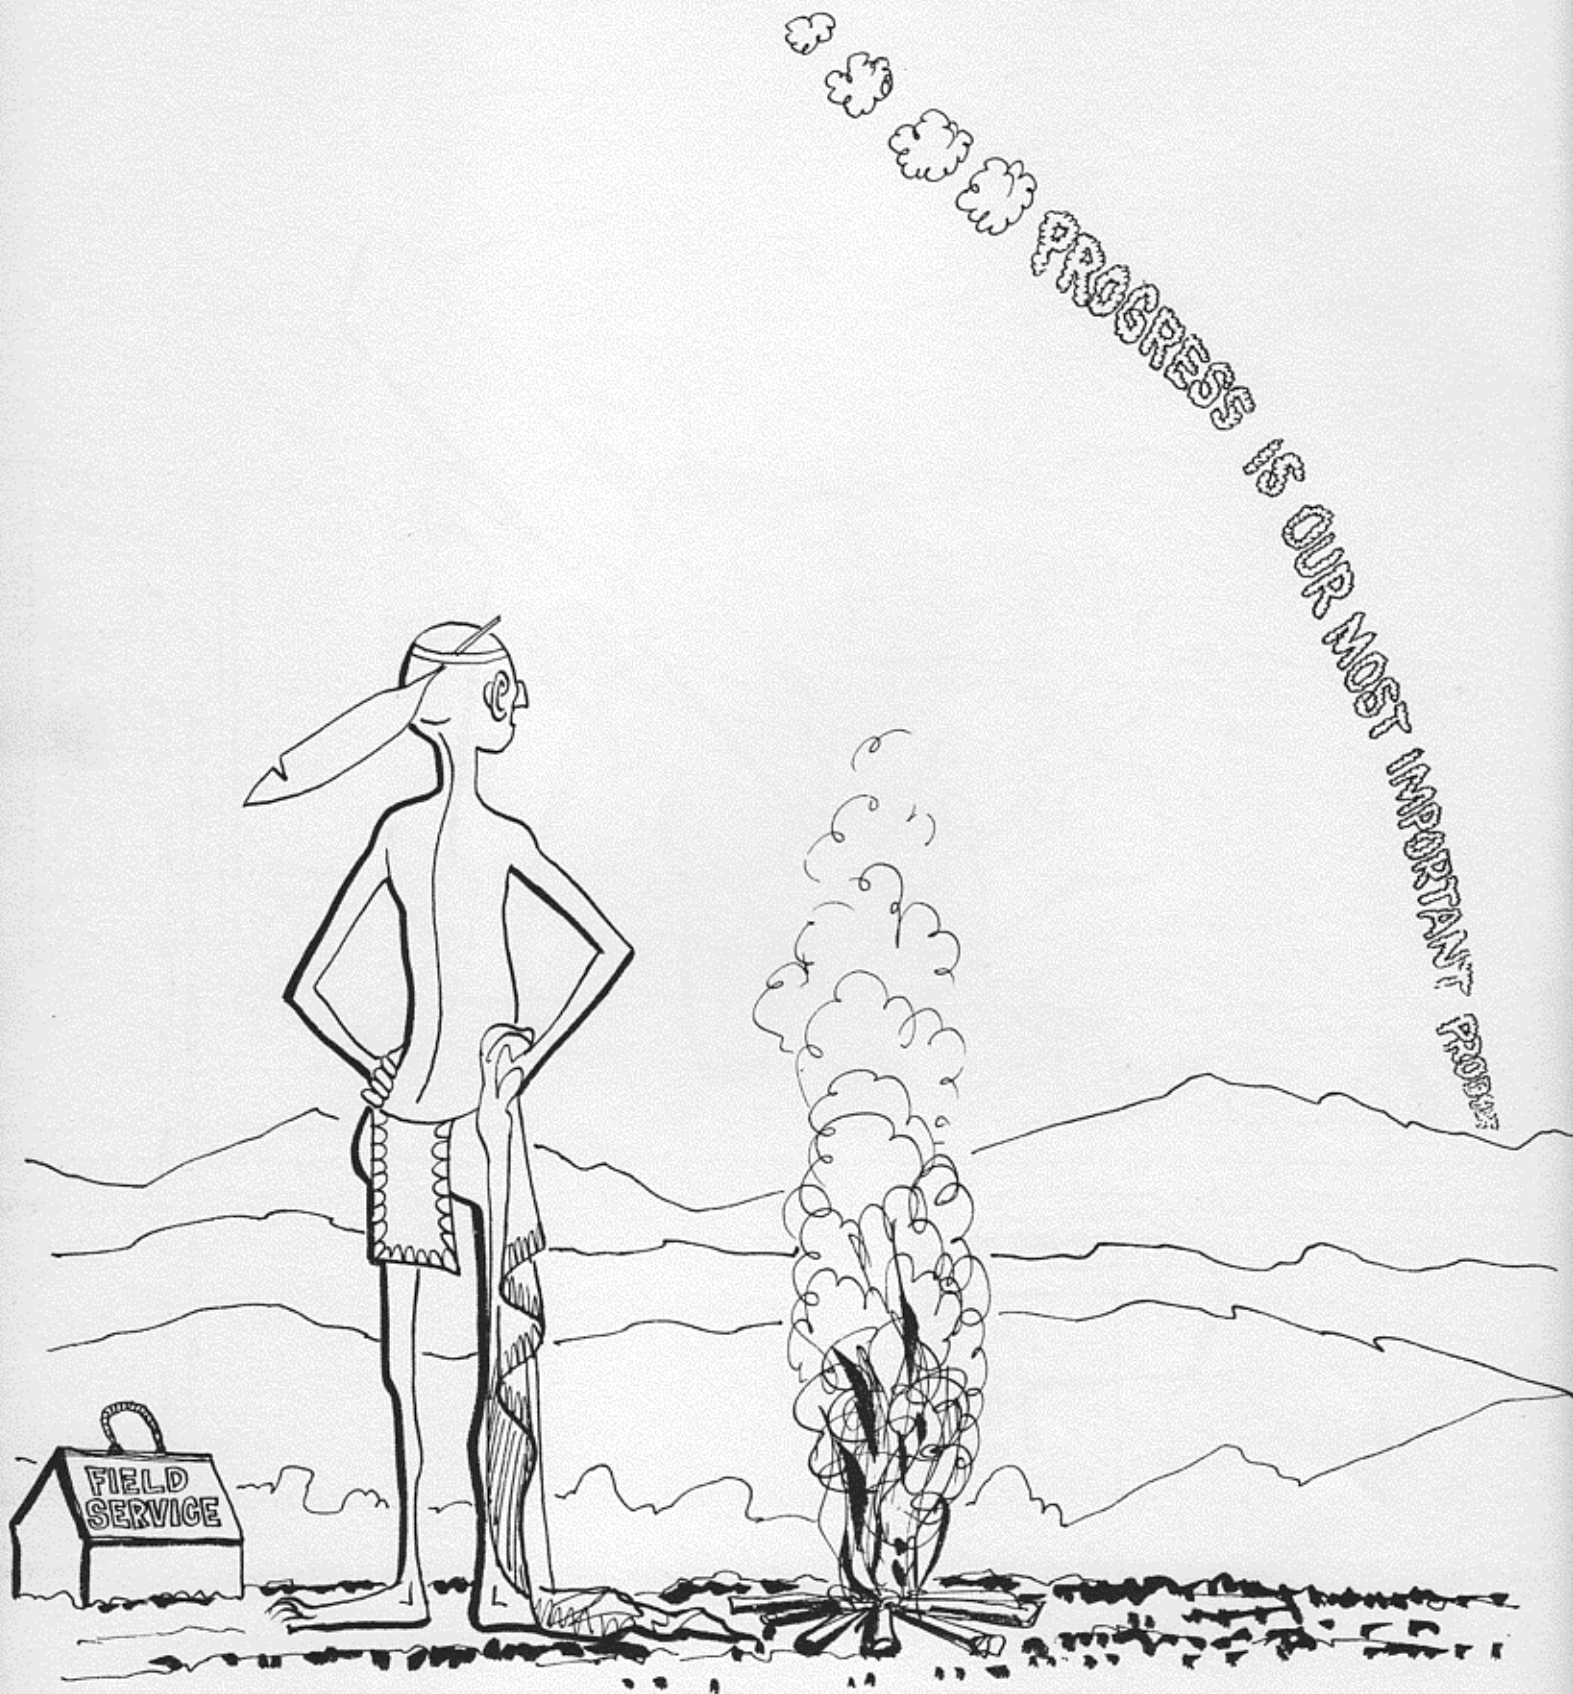

This is our correlator.  
Color it dynamic.

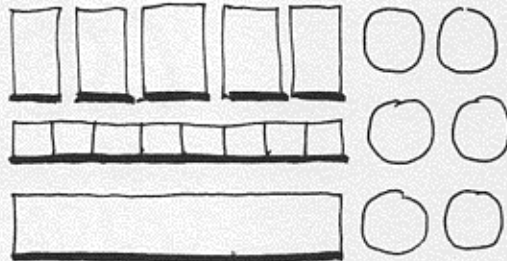

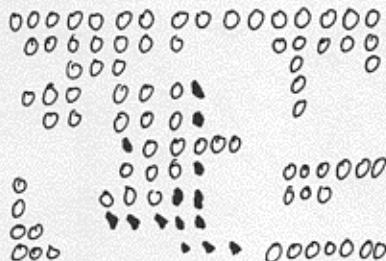

This is the intercept vectoring &  
ground to air data link system.  
Color it reliable.

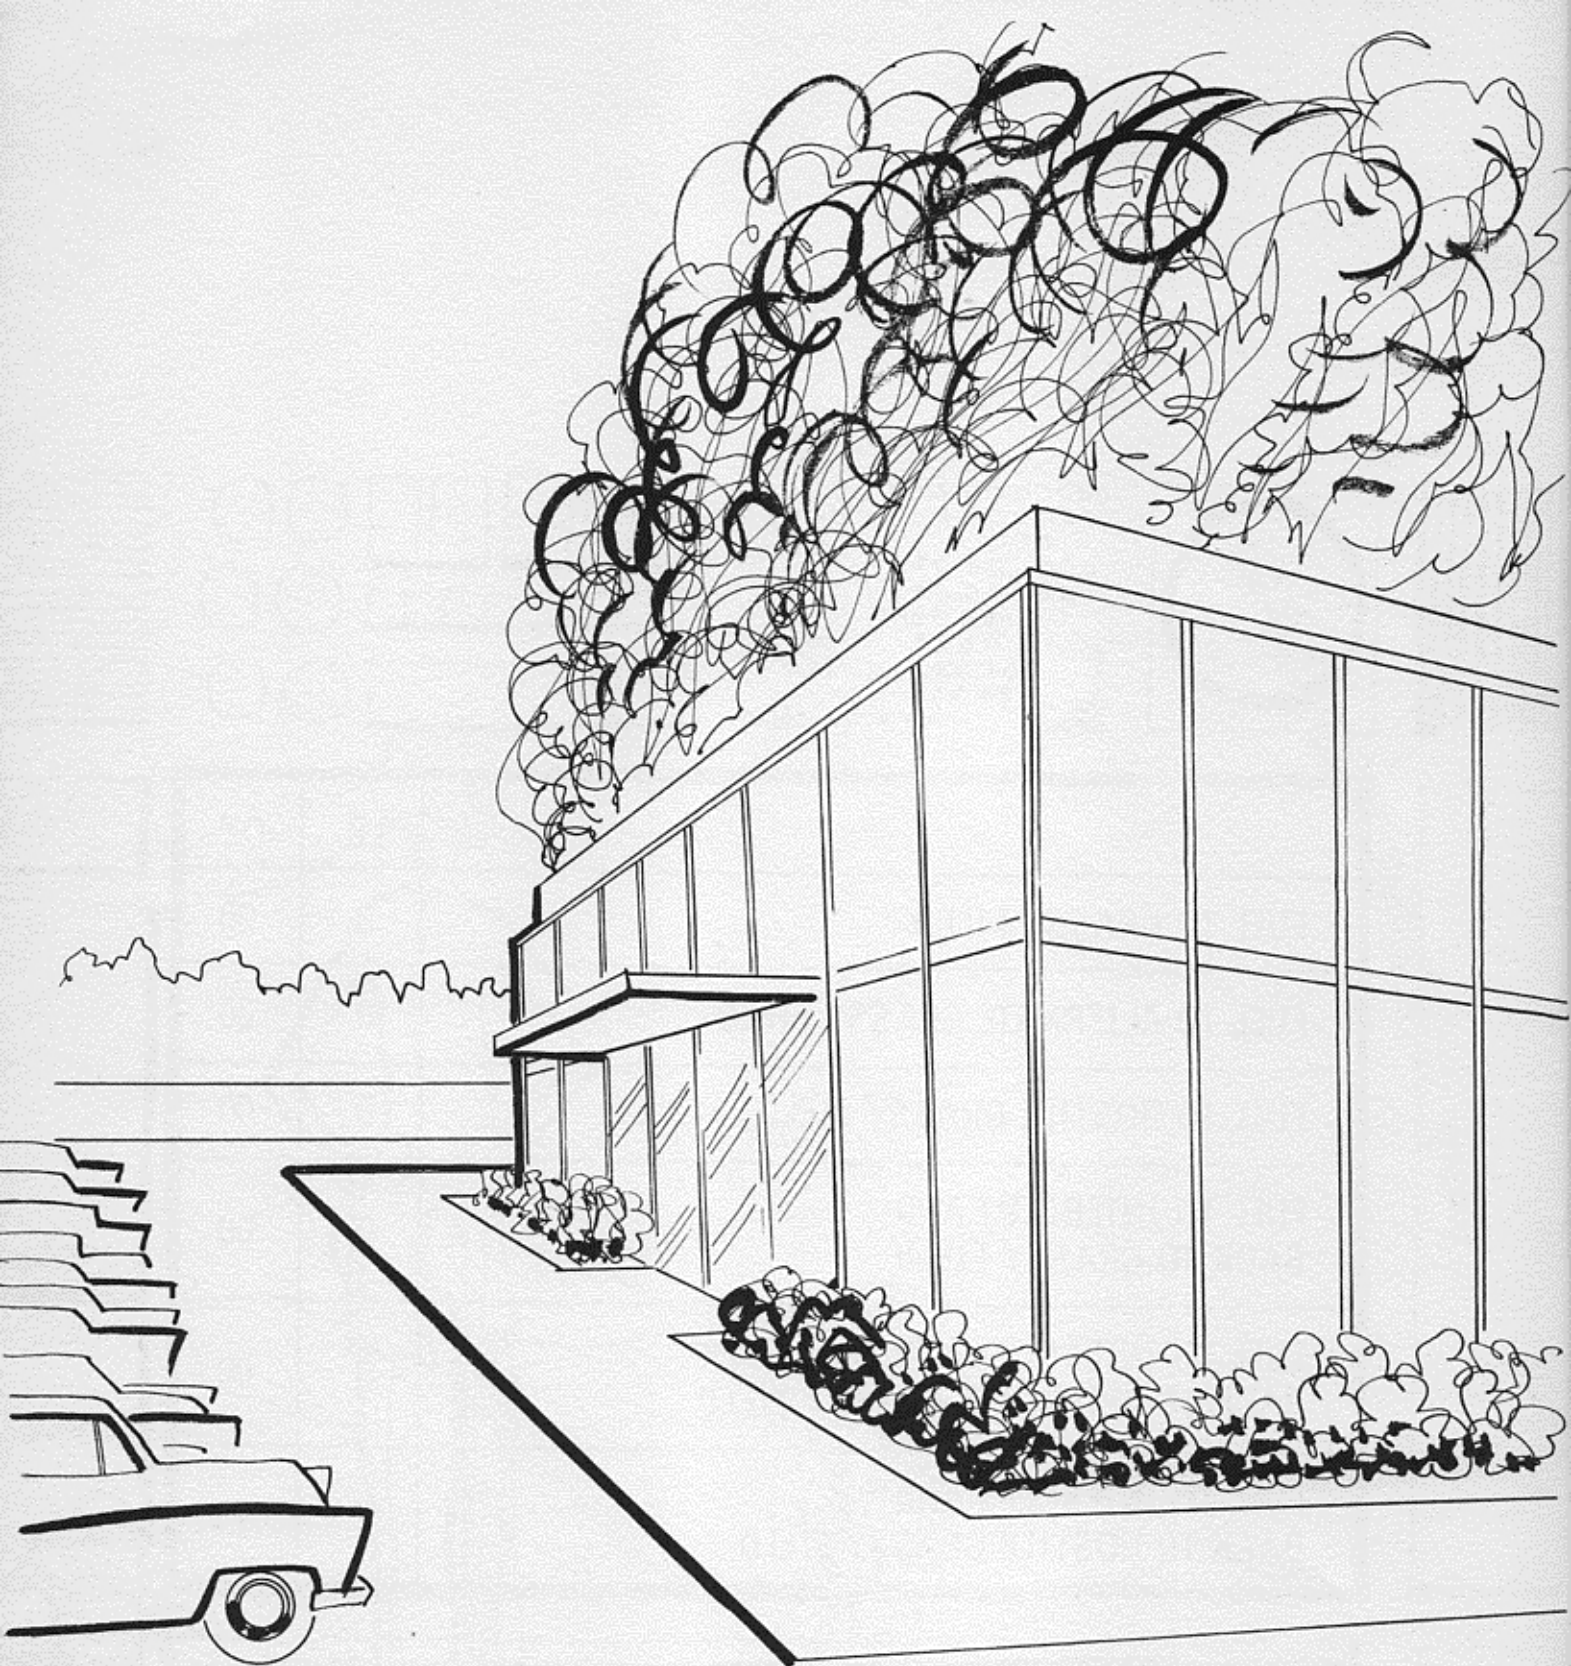

This is the intercenter data link.  
Color the report hostile.
